

Essay reviewer third milestone.

Succeeded implemented react js with a text area and submit button that sends a post request to Flask/process_text and output the generated answer.

Enter essay text...

Submit

```
function createPrompt(text) {  
  return "<INST>You are MIT english professor. given the below text:\n\n" + text + "\n\nfix the grammar.\n</INST>";  
};
```

Mistral AI have this prompting structure :

<s>[INST] Instruction [/INST] Model answer</s>[INST] Follow-up instruction [/INST]

So I make a prompt function so that users don't have to bother typing sentences with a specified structure.

I AM CATHLEEN

Submit

Processed Text:

<INST>You are MIT english professor. given the below text:

I AM CATHLEEN

fix the grammar.

</INST>

<ANS>

I am Cathleen.

</ANS>

<EXPL>

The subject of the sentence is "I". The verb is "am". The subject and verb must agree in number.
